

Collaborative Presentations with the Projector™ System

The **Projector** system enables instant and wireless presentation with just a click of a “Share” button from any Windows or Mac OS device to the display.

To Use Projector:

1. Visit <https://projector.com/downloads/> and **select the appropriate device/platform.***

*iOS and Android –not available due to limitations of the campus network.

2. Download the client, install it and then double-click on the shortcut or “projector.exe” and you should see the Projector Companion App display on your computer.*

*See the reverse side for the layout and description of the Projector Companion App.

3. To display your device on the television screen:
 - a. **Enter the Sharing Code** into the Projector app on your computer.

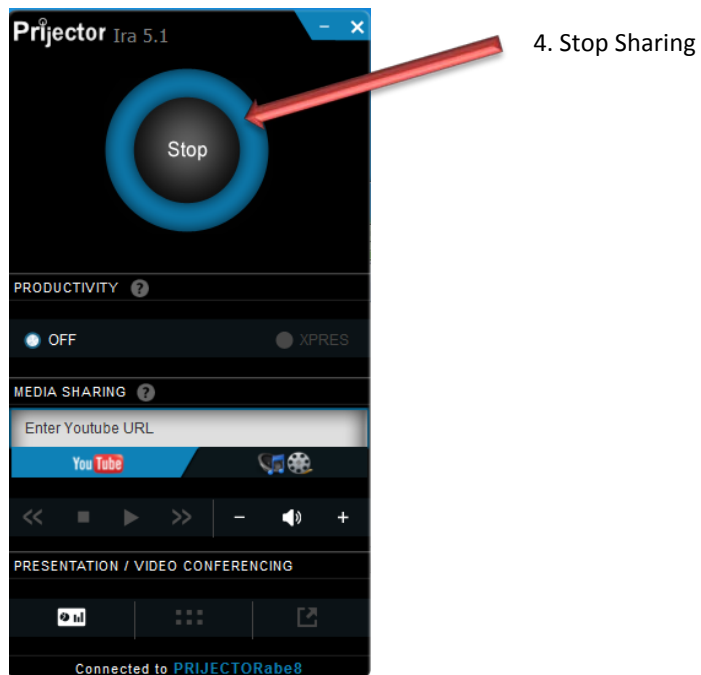

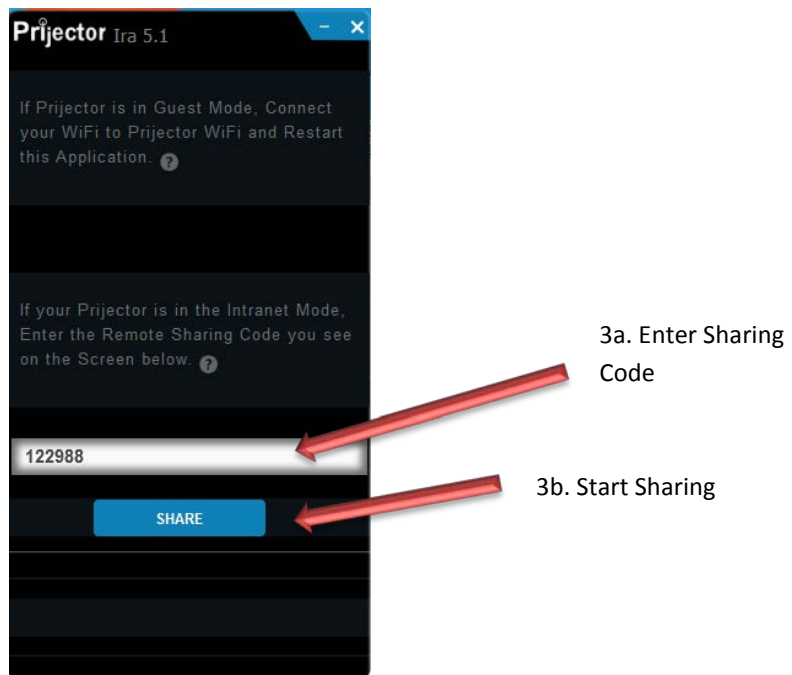

The **sharing code** displays at the bottom of your television screen. The sharing code shown in this document is for demo purposes only.

- b. **Click the Share button** located on the Projector Companion App.
4. To stop sharing, click the **Stop** button located on the Projector Companion App.

Further information on features can be found in the User Manual, <https://projector.com/user-manual.html>.

Prijector Companion App

This equipment is new to the Library group study rooms. Any feedback to the service desk or to helpdesk@library.tamu.edu is greatly appreciated.
